

EHS GLOBAL

ABOUT

EHS Global Transport is a logistics company rooted in Gaziantep's production and trade culture, offering fast, secure, and transparent solutions to its customers in domestic and international transportation processes. Growing with Gaziantep's strong industrial infrastructure and export dynamism, our brand serves with a flexible operational structure tailored to the changing needs of different sectors.

In transportation, we manage not only the cargo but also the time, cost, and risk. From planning to delivery, we control operations end-to-end through the selection of the right vehicle and route, cargo security, regular information, and process monitoring. Thanks to our partnership approach with our customers, we aim for sustainable and measurable logistics performance, going beyond standard transportation.

At the heart of our service philosophy are trust, speed, and a solution-oriented approach. Our experienced team produces solutions structured according to needs in areas such as partial and full load transportation, distribution organizations, project transportation, and special load planning. Throughout the process, we aim to add value to our customers' trade through transparent communication, timely delivery, and operational discipline.

Today, with our Gaziantep-based structure, we are constantly developing our service network that extends throughout Turkey and internationally; we operate with a business model that transforms logistics from a cost item for businesses into a competitive advantage.
